- **Perfect integration into BEMS / BMS systems**
- **12 VDC power supply**
- **Input for dry contact**
- **Suitable for wall or ceiling mounting**

KET-TLP-110 is an **environmental sensor capable of detecting the movement of people** within a radius of about 3-4 meters. The built-in **double light sensor** allows you to limit the lighting of lights only below a certain lighting threshold that can be set remotely. The temperature sensor completes the characteristics of the device.
The **ModBUS** interface allows the connection of the KET-TLP-110 to **SCADA** systems, programmable logic and standard monitoring systems.
The dry contact input can be used for connecting door / window contacts, PIR sensors or control buttons.
Designed to easily integrate into energy supervision and management systems (BMS / BEMS).
